Mixing styles gives the home charm and sophistication. An entrance hall follows through a shaded porch and then an extensive kitchen-living, which is the architectural center of the house. The facade bay window attracts attention with its uniqueness from the outside, thanks to a sufficiently contrasting solution to combine natural stone and wood. From the inside, this element creates a feeling of spaciousness and transparency of the walls. An open terrace gives additional volume to space.

The second floor is a circle of hospitable owners of the house. There are spacious bedrooms for adults and children, as well as a convenient storage room and a bathroom. A stylish balcony under

a canopy will allow you to enjoy nature at any time of the day.
