The house attracts the viewer's eye with its laconic facades and ideal geometry of outlines, giving rise to an image of monumentality and peace in the imagination. The project is designed in accordance with all modern trends in housing construction. An ideal solution for a suburban area. The house has three entrances, one of which leads from the vestibule to the living room, the second is organized through the kitchen to the summer terrace, and the third is located in a separate SPA area, where a steam room with a relaxation room and bathroom is located.
